## **Webber Coleman Woodworks now home to a Sub-Zero & Wolf working kitchen**

Athens, Georgia, November 18, 2013-The Webber Coleman Woodworks newly updated showroom is now home to a Sub-Zero and Wolf full working kitchen. Featuring a full suite of appliances from refrigeration, cooking, warming and ventilation, this new space truly allows a customer to experience all they could have in their own kitchen. "It is invaluable for clients to have the ability to touch and feel, open and close. It's important to be able to fully understand and spatially experience what your new kitchen could function as before you spend tens of thousands of dollars." says Jessica Webber, certified kitchen designer. The surrounding cabinets also feature items such as a pull out trash, knife block, pull out spice racks and tray dividers. The beautiful granite countertops only lend to the overall beauty of the space and people love trying out the new Delta faucet with Touch2O technology. "We are proud to partner with and showcase such reputable companies to bring our clients a truly memorable experience." This new addition to the Webber Coleman Woodworks showroom allows them to host events such as a recent Oconee County Chamber of Commerce Women in Business luncheon, where the corporate chef for Sub-Zero & Wolf Southeast prepared lunch for them using the appliances in the showroom. It will also allow them to host other community and client appreciation events.

For more information visit, [www.webbercolemanwoodworks.com](http://www.webbercolemanwoodworks.com) or [www.subzero-wolf.com](http://www.subzero-wolf.com) or call to schedule a visit to the showroom with Jessica at 706-769-9150.

Webber Coleman Woodworks is a 25+ year old local business specializing in custom cabinetry for residential and commercial applications.
